

## **NetNumber Continues Global Expansion**

LOWELL, Mass. — Jan. 20, 2015 — Continuing to deliver on its global growth plans, NetNumber announced today it has expanded sales and solution design support in North America, Europe and the Middle East, and added resources to cover the growing telecom markets in South America, Asia, Africa and Australia. As telecom operators are transitioning rapidly to converged network architectures led by VoLTE and DIAMETER, NetNumber is positioning itself to be a solution provider of choice around the globe.

“Operators are looking for solutions that support next-generation networks and the delivery of new services onto a common core platform, while reducing OPEX and the myriad of problems associated with hyper-complexity in the OSS and BSS layers,” explained Matt Rosenberg, vice president, NetNumber Global Sales, Solution Design and Product Management. “TITAN is the solution to the problems most operators are facing today in the signaling, routing and database services layers of the network. By expanding our global footprint, we can better support our customers and partners no matter where they are located. The NetNumber team now is physically located in 21 cities, and we speak 19 languages and represent the talent from more than 25 of the top industry vendors around the world.”

The NetNumber TITAN platform provides multi-protocol centralized signaling and routing control (CSRC) services for a converged network. TITAN is a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with a powerful distributed, in-memory database replication method that enables all signal processing to happen at the optimal location in an operator’s network. TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs. Today, TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.

With headquarters in Lowell, MA, NetNumber now offers satellite sales and solutions design offices in the US in Chicago, Tampa, San Jose, Phoenix, Norfolk and Raleigh; in Europe in Manchester, Paris, Amsterdam, Utrecht, The Hague, Madrid, Frankfurt, Munich, Anglet; in the

Middle East in Dubai and Riyadh; in Asia and Australia in Bangalore and Sydney; and in Latin and South America in Mexico City and Rio de Janeiro.
