

NetNumber Joins Competitive Carriers Association

LOWELL, Mass. — Feb. 10, 2015 — NetNumber today announced it has joined the Competitive Carriers Association (CCA). Headquartered in Washington, DC, CCA advocates on behalf of members' interests and works to educate policymakers on the key issues that impact members' ability to compete, survive, and thrive.

“The work CCA does is critical to our customers,” Matt Rosenberg, vice president of NetNumber Global Sales, Solution Design and Product Management. “Carriers are dealing with complex technology, industry forces and regulatory requirements around such issues as Next-Generation 911. As TITAN plays an increasingly strategic role in the core network of our carrier customers, being a member of CCA enables us to understand and support the issues impacting our customers.”

TITAN is a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with a powerful distributed, in-memory database replication method that enables all signal processing to happen at the optimal location in an operator's network. TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs.

Today, TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.
