

FOR IMMEDIATE RELEASE

NetNumber to Sponsor GENBAND's Perspectives15 Annual Customer & Partner Summit in Orlando, Florida

LOWELL, Mass. – May 5, 2015 — NetNumber today announced that it is an Exhibitor Sponsor at [GENBAND™ Perspectives15](#) Annual Customer and Partner Summit, held May 17-21, 2015 at the JW Marriott Orlando Grande Lakes. Perspectives15 brings together the brightest minds in the communications, software, service provider, channel partner and enterprise communities to share the latest trends, issues and opportunities affecting the communications landscape.

“NetNumber is excited to be part of Perspectives15,” said Steve Legge, NetNumber Vice President of Corporate Development. “This is a great venue for showcasing our innovative signaling and subscriber data management solutions to a broad audience, and participating in the dialogue around the most critical challenges carriers face as they transition their networks from legacy to next-generation LTE and IMS services.”

“Perspectives has quickly become one of the signature, must-attend events in the industry and it would not be possible without the support of great partners like NetNumber,” said Patrick Joggerst, EVP & Chief Marketing Officer at GENBAND. “Perspectives is being held at a new, larger venue this year and with the lineup of top-tier presenters, sponsors and entertainment that we have scheduled, this year’s conference promises to be the best yet. We are looking forward to NetNumber and our other partners being a significant part of the success of this year’s event.”

NetNumber will showcase its centralized signaling and routing control (CSRC) platform, TITAN, during the event. NetNumber TITAN is a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with powerful distributed, in-memory database replication technology and more than 15 virtual network functions, thereby ensuring that all signal processing and policy enforcement services are delivered at optimal locations within an operator’s network. TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs. Today, NetNumber TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.

About GENBAND

GENBAND is a global leader in real time communications software solutions for service providers, enterprises, independent software vendors, systems integrators and developers in over 80 countries. The company’s **Network Modernization, Unified Communications, Mobility and Embedded Communications** solutions enable its customers to quickly capitalize on growing market segments and introduce differentiating products, applications and services.
