

## **NetNumber Joins Alcatel-Lucent Cloudband™ Ecosystem Program to Help Accelerate NFV Transformation**

LOWELL, Mass. — May 13, 2015 — NetNumber announced today it has joined the Alcatel-Lucent Cloudband™ Ecosystem program, the first open community of platform vendors, virtual application vendors and service providers who are developing Network Functions Virtualization (NFV). Cloudband ecosystem members are working to accelerate market development for NFV, and to progress use cases through sharing experiences, running tests, and developing use cases. NetNumber has introduced its TITAN centralized signaling and routing control (CSRC) platform into this NFV community for solution integration of its signaling and database virtual network functions.

NetNumber TITAN is a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with powerful distributed, in-memory database replication technology, combined with more than 15 virtual network functions, delivering all signal processing and policy enforcement to optimal locations in an operator's network. TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs.

“The transition to virtualized environments for core network functions is well underway. As service providers make this transition and progress toward NFV, they want to retain the ability to deploy a multi-vendor environment while ensuring all the components interwork seamlessly,” said Steve Legge, vice president of Corporate Development, NetNumber. “NetNumber brings order to a complex signaling and database environment, eliminating information silos and resolving complex signaling interworking challenges. Our portfolio of virtual network functions spans legacy SS7 signaling and database functions through to SIP and DIAMETER core network functions. NetNumber is excited to join the CloudBand Ecosystem Program, and share our expertise to help accelerate the transition to NFV for service providers around the world.”

Today, TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.

### **About NetNumber**

NetNumber, Inc. brings 15 years of experience delivering innovative signaling control solutions that enable carriers to accelerate implementation of new services across multiple generations of networks, while dramatically simplifying the core network and reducing operating costs. Today, we are the leading provider of Centralized Signaling and Routing Control (CSRC) solutions to the global communications industry. Visit [www.netnumber.com](http://www.netnumber.com) for more information. Connect with us on Twitter, LinkedIn, Google+ and Facebook.
