

NetNumber Named Promising SDN Solution Provider by CIOReview

LOWELL, Mass. — August 25, 2015 — NetNumber has been chosen by CIOReview for its [20 Most Promising Software Defined Networking Solution Providers 2015](#). This award is based on evaluation of NetNumber TITAN, the industry's most robust centralized signaling and routing (CSRC) platform, which delivers SS7/C7, SIGTRAN, ENUM, DNS, SIP and DIAMETER services on the same signaling-control platform while centralizing the provisioning and simplifying the network's OSS/BSS layers.

More than 500 companies were researched by the editorial team from CIOReview for this special edition on SDN. A panel comprising CEOs, CIOs, VCs, analysts and the editorial board of CIOReview selected the final 20 based on technology leadership.

“NetNumber has been on our radar for some time for stirring a revolution in the SDN space, and we are happy to showcase them this year due to their continuing excellence in delivering top-notch SDN solutions,” said Jeevan George, managing editor, CIOReview. “NetNumber's solutions continued to break new ground within the past year, benefiting its customers around the globe, and we're excited to have them featured on our top companies list.”

“NetNumber is honored to be recognized by CIOReview and the industry as a key player in the emerging area of software defined networking,” said Brad Boston, president and CEO, NetNumber. “We are focused on addressing some of the most pressing problems facing network operators today by making network signaling smarter. By doing so, we help make networks work in a smarter way to deliver voice, video and data traffic optimized for the operator's network.”

Today, TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.
