

## **NetNumber TITAN Shortlisted for “Best Mobile Technology” at MWC16**

LOWELL, Mass. — Feb. 9, 2016 —NetNumber announced today its TITAN platform has been named a finalist for Best Mobile Technology by the GSMA Global Mobile (Glomo) Awards. NetNumber TITAN, the industry’s most robust centralized signaling and routing (CSRC) platform, provides a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with a powerful distributed, in-memory database replication method that enables all signal processing to happen at the optimal location in an operator’s network.

“NetNumber is honored to be recognized by the GSMA in the Glomo Awards 2016 and by the mobile industry,” said Kim Gibbons, NetNumber chief marketing officer. “Operators are looking for solutions that ease their transition to next-generation networks and provide service agility, while reducing Opex/Capex spend. Our innovative software platform TITAN enables operators to deploy next-generation services faster and with lower Opex investment, while also easing the transition from legacy networks to IP. This Glomo Awards nomination helps to validate our unique approach to solving many critical operator challenges.”

“Congratulations to all of the nominees for the 2016 Glomo Awards,” said Michael O’Hara, chief marketing officer, GSMA. “With more than 930 entries this year – a new record – the competition is greater than ever, reflecting the tremendous diversity and pace of innovation across the mobile world. We are particularly excited to be celebrating the 21<sup>st</sup> year of the awards with a dynamic new format that will recognise and honour achievement throughout Mobile World Congress.”

TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs. Today, TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.
