

NetNumber Opens New European Headquarters

LOWELL, Mass. and Utrecht, Netherlands — Apr. 5, 2016 — NetNumber announced today it has opened a new office in the Netherlands to serve as the company’s European headquarters. Located in Utrecht, NetNumber has added a second headquarters in response to the growing demand by international telecom operators for NetNumber solutions and technical support. As telecom operators are transitioning rapidly to converged network architectures, predominately led by VoLTE, VoWiFi, and a range of mobility services, NetNumber is positioned to be the solution provider of choice.

“NetNumber has seen tremendous expansion in all geographies this past year,” explained Matt Rosenberg, vice president, NetNumber Global Sales, Solution Design and Product Management. “The European headquarters is necessary to keep up with the growth and expectations of our international customer base. With this new facility, our global customers can continue to receive the same world-class service we have been providing for years for our solutions design and on-going 24x7 technical support. This is an important time for the global telecom industry as it invests in infrastructure and network capabilities to increase service offerings and to expand into new markets. Our aim is to match our customers’ growth plans with our capabilities to service their demands.”

Jeroen Nijland, commissioner at the Netherlands Foreign Investment Agency (NFIA): “We are delighted with NetNumber’s decision to establish its European headquarters in the Netherlands. This confirms once again that the Netherlands offers a competitive and attractive business climate for headquarter operations, and a strategic location at the center of Europe’s largest markets. And of course, it was a pleasure to be able to support NetNumber in the realization of this project, together with our local partner in the Netherlands, Invest Utrecht.”

NetNumber TITAN, the industry’s most robust centralized signaling and routing (CSRC) platform, provides a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. Customers easily can add a wide range of applications to support the transition from legacy to next-generation networking in one

platform. Customer-defined service logic enables carriers to define a user interface consistent across all the applications deployed in TITAN, thus reducing training time and costs, and minimizing impact to current OSS/BSS systems. TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs. Today, TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.

With headquarters in Lowell, MA and Utrecht, Netherlands, NetNumber also offers satellite sales and solutions design offices in the United States in Chicago, Tampa, San Jose, Phoenix, Miami, Norfolk and Raleigh; in Europe in Manchester, London, Paris, Amsterdam, Utrecht, The Hague, Prague, Porto, Madrid, Frankfurt, Munich, Anglet; in the Middle East in Dubai and Riyadh; in Asia and Australia in Bangalore, Kuala Lumpur, Hong Kong and Sydney; and in Latin and South America in Mexico City and Rio de Janeiro.
