

NetNumber Named One of Fastest Growing Networking Companies by The Silicon Review Magazine

LOWELL, Mass. — April 26, 2016— NetNumber has been recognized by Silicon Review as one of the “[10 Fastest Growing Networking Companies](#).” This selection is based on evaluation of NetNumber business strategy and success of its innovative TITAN centralized signaling and routing control (CSRC) platform in the global communications industry. With more than 150 customers around the globe, NetNumber is helping operators transition to converged network architectures led by VoLTE and Diameter. The TITAN platform is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs.

The Silicon Review 10 Fastest Growing Networking Companies of the Year program identifies the most dynamic companies that have made significant contributions in the field of Business and Technology and is designed to showcase companies that provide the most leading and groundbreaking effective technologies. The publication selected NetNumber based on its revenue growth, creativity in innovation, customer reviews and domain influence. Read the profile on NetNumber at

“Several Networking companies including NetNumber are making their mark as innovators and leaders in the digital world today. And in spite of facing the big challenge of sustainable growth while continuing to innovate and deliver better, NetNumber has proven its true potential with an endurance, vision and mission, deserving commendation for the same”, said Sreshtha Banerjee, managing editor, The Silicon Review Magazine.

“NetNumber is honored to be recognized by Silicon Review and the industry for its success in the global communications industry,” said Brad Boston, president and CEO, NetNumber. “Telecom operators are choosing TITAN because it provides an unprecedented level of flexibility and operational uniformity in a single platform that can provide service agility, improve network efficiency and reduce Opex and Capex costs. NetNumber is positioned to be a solution provider of choice around the globe.”

TITAN provides a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with a powerful distributed, in-memory database replication method that enables all signal processing to happen at the optimal location in an operator’s network. Today, TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.
