

## **NetNumber Named “One to Watch” at IMS World Forum**

LOWELL, Mass. — May 25, 2016 — NetNumber, a leading provider of centralized signaling and routing control (CSRC) solutions, announced today it has received the “One to Watch” award at the 13<sup>th</sup> annual IMS World Forum held in Amsterdam. This award recognizes agile and innovative solution providers in the IMS space that bring more choice and innovation to tier 1 and 2 operators. Finalists and winners were selected by a panel of judges representing the telecom industry. The NetNumber TITAN platform was evaluated as it enables operators to transition to converged network architectures led by VoLTE, VoWiFi and a range of mobility services.

NetNumber TITAN provides a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with a powerful distributed, in-memory database replication method that enables all signal processing to happen at the optimal location in an operator’s network. Today, TITAN is deployed by more than 170 operators on more than 350 servers on five continents, and supports more than 200 billion transactions per month.

“NetNumber is honored to be recognized by the industry with this award,” said Brad Boston, NetNumber president and CEO. “Being named “One to Watch” reinforces the unique and innovative capabilities of the TITAN platform to lessen the negative impact of signaling traffic. By doing so, TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs.”

### **About NetNumber**

NetNumber, Inc. brings 16 years of experience delivering innovative signaling control solutions that enable carriers to accelerate implementation of new services across multiple generations of networks, while dramatically simplifying the core network and reducing operating costs. Today, we are the leading provider of Centralized Signaling and Routing Control (CSRC) solutions to the global communications industry. Visit [www.netnumber.com](http://www.netnumber.com) for more information. Connect with us on Twitter, LinkedIn, Google+ and Facebook.

**About the IMS World Forum**

IMS is a cornerstone of many MNO strategies for enabling quality services worldwide. This IMS World Forum 2016 event was a great success, where delegates were offered a unique opportunity to hear case-study presentations from leading operators in the field, alongside exclusive speed networking and 1-2-1 meetings with key industry stakeholders. The IMS Industry Awards take place alongside the World Forum annually and will take place again in Amsterdam on 16-17 May 2017. See <https://worldforum.imsvision.com/>
