

## STEVE LEGGE

### Chief Operating Officer

Steve Legge serves as the NetNumber Chief Operating Officer, responsible for driving the company's continued transition to an Agile business, scaling operational capabilities and services and evolving the TITAN platform, products and data services to meet evolving and growing market demands.

Legge joined NetNumber, Inc. as Vice President, Corporate Development in November 2013 to lead the company's global partner strategies and reseller programs. Most recently, he served as General Manager, NetNumber Global Data Services and Senior Vice President, Product Management. He has held senior executive management and technical positions in the broadcast, telecommunications and satellite industries in the US and Australia for more than 20 years.

Prior to joining NetNumber, Legge was Vice President of Telecom and Space Systems for VT iDirect, Inc., a Virginia-based satellite network equipment manufacturer. Previously, he was manager of Global Business Development for the Satellite Solutions group at Cisco.

Before relocating to the US in 2008, Legge was the co-founder and Chief Operating Officer at SP Telecommunications, a national voice and broadband carrier in Australia. Under his leadership the company became the third largest carrier in the Australian market. SP Telecommunications was the first national IP-based carrier delivering both IP VPN and IP-based PSTN voice services to Australian enterprise, government and consumer customers.
