

## **NetNumber Growth in LATAM Fueled by Operator Investment**

### ***LTE and 4G Network Coverage Accelerating in Region***

LOWELL, Mass. — Dec. 21, 2017 — NetNumber announced today it has seen significant growth in its Latin America customer base over the past few years. According to the GSMA, smartphone adoption across Latin America (LATAM) has grown to 59% of total connections by the first half of 2017. Operators have launched more than 100 LTE networks as of June 2017, covering more than 70% of the population across the region. 4G adoption rates are also accelerating. NetNumber is well positioned to support growth in the LATAM region, and across the globe.

“Operators in LATAM are investing to modernize their networks for new services and expanded capacity,” explained Matt Rosenberg, senior vice president, NetNumber Global Sales. “The NetNumber TITAN platform is ideally suited to enable the path towards network modernization, and as such, is playing an increasingly strategic role in the core network. And as operators migrate to next-generation IP networks and 5G in the future, TITAN ensures services operate seamlessly across legacy 3G and these new networks. NetNumber TITAN customers can ‘layer on’ multiple applications to the existing TITAN platform as their network evolves, reducing the provisioning complexity while expanding service agility capacity.”

The NetNumber TITAN platform provides multi-protocol centralized signaling and routing control (CSRC) services for a converged network. TITAN is a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with a powerful distributed, in-memory database replication method that enables all signal processing to happen at the optimal location in an operator’s network. TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs.

### **About NetNumber**

NetNumber, Inc. brings 17 years of experience delivering innovative signaling control solutions that enable carriers to accelerate implementation of new services across multiple generations of networks, while dramatically simplifying the core network and reducing operating costs. Today, we are the leading provider of Centralized Signaling and Routing Control (CSRC) solutions to the global communications industry. Visit [www.netnumber.com](http://www.netnumber.com) for more information. Connect with us on Twitter, LinkedIn, Google+ and Facebook.
