

## **GO Selects NetNumber to Support Continued Growth in Malta**

LOWELL, Mass. — Jan. 30, 2018 — NetNumber announced today GO, Malta’s leading communications services company, has selected the NetNumber TITAN Centralized Signaling and Routing Control (CSRC) platform to support its focused strategy of delivering a world-class service in terms of infrastructure and customer experience. GO was recently named the fastest communication provider in the country, and is consolidating its core network with the Number Portability application on TITAN for fixed and mobile numbers. In a challenging and highly competitive marketplace, GO has been working with NetNumber since 2005 to deploy a smart signaling solution enabled by the TITAN CSRC platform. TITAN provides GO with an innovative application delivery model for a smarter signaling plane. The consolidation of the numbering and user data helps GO drastically simplify the network and reduce latency in the control plane.

“GO has had a relationship with NetNumber for more than a decade, and we have been impressed by the network consolidation benefits delivered in the NetNumber TITAN platform,” said Richard Crossley, senior manager, Core Networks for GO. “Converged fixed and mobile number portability were the first applications we deployed. As TITAN enables us to easily add new applications, NetNumber now is advising GO on additional functionality on the TITAN platform to further centralize and introduce smarter signaling throughout the GO network.”

The NetNumber TITAN platform provides multi-protocol centralized signaling and routing control (CSRC) services for a converged network. TITAN is a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with a powerful distributed, in-memory database replication method that enables all signal processing to happen at the optimal location in an operator’s network. TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs.

“Today’s telecom networks are stressed by financial, functional, operational and efficiency constraints,” explained Matt Rosenberg, senior vice president, NetNumber Global Sales. “However, every operator has unique and specific requirements that can be addressed by the flexibility inherent in the TITAN programmable architecture. NetNumber TITAN enables customers like GO to ‘layer on’ multiple applications to the existing TITAN platform as their network evolves, reducing the provisioning complexity while expanding service agility capacity.”

Learn more about NetNumber TITAN at <http://netnumber.com/products/titan/> or by contacting [sales@netnumber.com](mailto:sales@netnumber.com). NetNumber will be exhibiting at MWC’18 in Barcelona. Visit NetNumber in Hall 7, Stand #7D81 to meet the leadership team and subject matter experts.

### **About NetNumber**

NetNumber, Inc. brings 17 years of experience delivering innovative signaling control solutions that enable carriers to accelerate implementation of new services across multiple generations of networks, while dramatically simplifying the core network and reducing operating costs. Today, we are the leading provider of Centralized Signaling and Routing Control (CSRC) solutions to the global communications industry. Visit [www.netnumber.com](http://www.netnumber.com) for more information. Connect with us on Twitter, LinkedIn, Google+ and Facebook.
