

NetNumber Receives “Best Core Network Product” Award at 5G MENA

NetNumber TITAN Platform Enables Operator Network Modernization Efforts

LOWELL, Mass. — April 11, 2018 —NetNumber announced today its TITAN platform received the award for “Best Core Network Product” at the 5G MENA conference on April 9 in Dubai. The 5G MENA awards celebrate excellence in the MENA region’s LTE and 5G community. NetNumber TITAN, the industry’s most robust centralized signaling and routing (CSRC) platform, is ideally suited to enable the path towards network modernization and plays an increasingly strategic role in the core network. As operators migrate to next-generation IP networks and 5G in the future, TITAN ensures services operate seamlessly across legacy 3G and these new networks.

NetNumber TITAN provides a common, virtualized infrastructure for all signaling control, routing policy enforcement and subscriber database services in the network. It uniquely delivers centralized provisioning and management combined with a powerful distributed, in-memory database replication method that enables all signal processing to happen at the optimal location in an operator’s network. TITAN is transforming how operators deliver new services to their customers while significantly simplifying the network core and reducing operating costs.

“NetNumber is honored be recognized by the industry for our TITAN platform,” said Matt Rosenberg, senior vice president, NetNumber Global Sales. “In the last fourteen months, we have doubled our growth in the Middle East as operators invest to modernize their networks for new services and expanded capacity. NetNumber TITAN customers can ‘layer on’ multiple applications to the existing TITAN platform as their network evolves, reducing the provisioning complexity while expanding service agility capacity. Operators are selecting a range of NetNumber applications, including STP, SS7 and Diameter Firewalls, CRE, SIP Proxy, ENUM and security data services. We are well positioned for continued growth in the MENA region, and anticipate further investment in resources over the coming year.”
