

NetNumber Listed as a Sample Vendor in Gartner’s Hype Cycle for the Future of CSP Network and Business Operations, 2018

NetNumber Recognized under the Private LTE Category

LOWELL, Mass. — Aug. 15, 2018 — NetNumber, a leading provider of CSP Network and Business Operations solutions, today announced it has been identified as a Sample Vendor in the Gartner “Hype Cycle for the Future of CSP Network and Business Operations, 2018” report. NetNumber was named in the Private LTE category.

Private LTE networks are deployed by public safety, defense organizations, and other enterprise vertical markets that need secure, reliable LTE communications in the field. These networks enable enterprises to extend or augment their existing IP infrastructures with private wireless solutions that allow for enhanced capabilities, secure communications in emergencies and large-scale coverage in hard-to-reach locations.

“NetNumber has seen tremendous interest in our Private LTE solutions since we first delivered the capability to market two years ago,” said Matt Rosenberg, senior vice president, NetNumber Global Sales and Partner Development. “Enterprises of all types are recognizing how they can benefit from deploying their own small, scalable and secure LTE-based signaling networks to establish new or augment existing wireless capabilities. We are excited to be named by Gartner as a Sample Vendor as we believe it reinforces the value of our Private LTE solution to our CSP and Enterprise customers.”
