

NetNumber Listed as a Sample Vendor in Gartner’s Hype Cycle for the Future of CSP Wireless Networks Infrastructure, 2018

NetNumber Cited under the Private LTE Category

LOWELL, Mass. — Sept. 12, 2018 — NetNumber, a leading provider of CSP network solutions, today announced it has been identified as a Sample Vendor in the Gartner “Hype Cycle for the Future of CSP Wireless Networks Infrastructure, 2018” report. NetNumber was named in the Private LTE category. NetNumber was also identified recently as a Sample Vendor in the Private LTE category in the Gartner “Hype Cycle for the Future of CSP Network and Business Operations, 2018” report. In both reports, Gartner notes that “Private LTE is one of the opportunities for CSPs to grow their revenue.”

Private LTE networks are deployed by public safety, defense organizations, and other enterprise vertical markets that need secure, reliable LTE communications in the field. These networks enable enterprises to extend or augment their existing IP infrastructures with private wireless solutions that allow for enhanced capabilities, secure communications in emergencies and large-scale coverage in hard-to-reach locations.

“NetNumber is excited to be named by Gartner as a Sample Vendor in two recent Hype Cycle reports,” said Matt Rosenberg, senior vice president, NetNumber Global Sales and Partner Development. “Because of the unique capabilities within the NetNumber TITAN platform, our Private LTE solutions enable CSPs to offer easy to deploy LTE-based services to a variety of vertical markets in small-scale virtual or hardware-based deployments. We have worked with carriers to deploy these Private LTE solutions in their signaling networks, providing new or augmenting existing wireless capabilities in numerous deployment scenarios.”
