NetNumber SS7 and IMS Expert to Present Carrier Perspective on Simplifying Signaling Control to Manage Migration from TDM to IP Networks During the Signaling Focus Day at LTE World Summit 2014

LOWELL, Mass. — June 16, 2014

WHO:

Pieter Veenstra is a recognized SS7 and IMS expert from NetNumber with 30 years of Telco experience. He will present during the Signaling Focus Day at LTE World Summit 2014, “Radically Simplifying Signaling Control to Manage SS7, ENUM, SIP and Diameter Simultaneous Networks.”

WHEN:

Monday, June 23, 2014 at 9:40 am Local Time

WHERE:

LTE World Summit 2014
Amsterdam RAI, Netherlands

WHAT:

In his remarks, Mr. Veenstra will discuss the major challenges carriers face in the migration to IP, including the increase in signaling complexity with ENUM, SIP and Diameter. He will advocate for carriers to consider a strategic paradigm shift to a centralized routing model to solve the signaling surge, use signaling control to simplify the OSS/BSS chaos, and to migrate the signaling control layer in the NFV infrastructure.

About NetNumber

NetNumber, Inc. brings 14 years of experience delivering innovative signaling control solutions that enable carriers to accelerate implementation of new services across multiple generations of networks, while dramatically simplifying the core network and reducing operating costs. Today, we are the leading provider of converged signaling, routing and database services to the global communications industry. Visit www.netnumber.com for more information. Connect with us on [Twitter](#), [LinkedIn](#), [Google+](#) and [Facebook](#).
