NetNumber Recognized by Telecoms.com LTE Awards 2014 as Finalist for Best LTE Core Network Product

LOWELL, Mass. — June 3, 2014 — NetNumber announced today its selection as a finalist in this year's LTE awards program sponsored by Telecoms.com. NetNumber was shortlisted in the Best LTE Core Network Product category, which recognizes exceptional core network elements.

NetNumber was selected as a finalist for its innovative, industry leading product, TITAN, which provides a common NFV infrastructure for all signaling control, policy enforcement and subscriber database services in the network. TITAN is transforming how operators deliver new high-definition voice and video services to their customers while drastically simplifying the network core and reducing operating costs. Today, NetNumber TITAN is deployed on more than 350 servers on five continents, and supports more than 200 billion transactions per month.

“We are pleased our product TITAN has been recognized by industry as a finalist for this award,” said Brad Boston, NetNumber CEO. “NetNumber has been working closely with operators to deliver an infrastructure that solves some of their most critical challenges as they transition their networks from legacy to next-generation LTE and IMS. It is exciting we are being recognized by Informa Telecoms and Media and the distinguished panel of judges in our first year of being nominated.”

About NetNumber

NetNumber, Inc. brings 14 years of experience delivering innovative signaling control solutions that enable carriers to accelerate implementation of new services across multiple generations of networks, while dramatically simplifying the core network and reducing operating costs. Today, we are the leading provider of converged signaling, routing and database services to the global communications industry. Visit www.netnumber.com for more information.
